Annual Report

Georgia Tech Institute for People and Technology

Key Research Areas
IPaT strives to bring to the forefront the right people and resources from multiple disciplines to focus on areas in which technology can improve quality of life, work, and play.

Transdisciplinary Research
IPaT’s interdisciplinary approach to health care, privacy, and security offers a unique opportunity to explore the opportunities and challenges associated with these domains.

Translational Impact
IPaT’s portfolio of work demonstrates the potential for technology-enabled solutions to improve health care outcomes and transform the patient experience.

Transformational Leadership
IPaT’s work is focused on enabling and empowering organizations to transform their operations, processes, and culture to better serve their stakeholders.

Georgia Tech Selected as a Top 100 University in the World

Georgia Tech was one of two academic institutions selected to receive the 2012 NSF Innovation Corps (I-Corps) Awards. The I-Corps program is designed to help universities and industry partners develop a culture of innovation and entrepreneurship.

FutureMedia Outlook 2012

Early indications of promising trends and innovations in the health care industry, including new technologies and regulatory changes, are discussed. The report also highlights the role of technology in improving patient care and outcomes.

Community Health

Georgia Tech and Children’s Healthcare of Atlanta announced the first annual Community Health Emmy Award to honor individuals and organizations who have made significant contributions to improving community health and well-being.

Convergence Innovation Competition 2012

The Georgia Tech Convergence Innovation Competition (CIC) is a national competition designed to identify and support innovative solutions to complex, multi-domain problems. The CIC is hosted by Georgia Tech with the support of the Georgia Institute of Technology Research Foundation (GIRF) and the Georgia Institute of Technology Foundation (GIFT).

Healthcare Transformation

Georgia Tech and the Children’s Healthcare of Atlanta announced a joint initiative to advance the use of health IT to benefit patients and providers. The initiative is designed to improve personal and population health care outcomes.

Future Media Outlook 2012

The report provides insights into emerging trends in the media and technology industries, including the impact of social media, mobile technologies, and cloud computing on the future of media and entertainment.

Georgia Tech and Children’s Healthcare of Atlanta announced the first annual Community Health Emmy Award to honor individuals and organizations who have made significant contributions to improving community health and well-being.
